#### Arts

Beginning Art  
Beginning Band  
Beginning Guitar  
Beginning Piano  
Jr. High Band  
Jr. High Choir  
Jr. High Theater

Math classes are determined by ability not grade. Prior to enrollment, each new student will take a math placement test. Although a student's placement test score will determine their math class, teachers monitor student progress at the beginning of the semester to ensure that math placement test scores accurately reflect student ability. Students whose math placement test scores are below the skills necessary for Introduction to Saxton must pass the course during summer school. Students enrolling mid-year whose math placement test scores are below the skills necessary for Introduction to Saxton will have the class twice a day (instead of an elective) until their grade consistently reflects a "C" or higher. After school math tutoring is mandatory for students receiving "D" and "F's."
